

SAMi™ for CCRPM (Remote Patient Monitoring)

Kencor health introduces SAMi™ to digitally engages patients outside the traditional care settings. SAMi reminds the patients to measure their vitals regularly and transmits automatically to Kencor platform while engaging the patients through a patient pending kencor conversations that can take place over any medium. A simple thirty second conversation with SAMi keeps the patients connected with their care team who monitors and intervene whenever it is required. SAMiConnect integrates with the latest AI technology to keep your patients engaged in their treatment plan while keeping your team connected to how they are doing. SAMi takes on the heavy lifting of gathering, interpreting, and reporting critical patient data collected from all connected devices. SAMi then processes and presents the data in a simple dashboard so your care team can take action.

The final 2019 Medicare Physician Fee Schedule released on November 1st creates three new codes in the category of Chronic Care Remote Physiologic Monitoring ("CCMRPM") for (1) initial setup and patient education, (2) initial device supply and (3) monitoring data and interacting with patients or caregivers.

The final code descriptors for the new CCRPM codes read as follows:

- **CPT Code 99453:** Remote monitoring of physiologic parameter(s) (eg, weight, blood pressure, pulse oximetry, respiratory flow rate), initial; set-up and patient education on use of equipment
- **CPT Code 99454:** Remote monitoring of physiologic parameter(s) (eg, weight, blood pressure, pulse oximetry, respiratory flow rate), initial; device(s) supply with daily recording(s) or programmed alert(s) transmission, each 30 days
- **CPT Code 99457:** Remote physiologic monitoring treatment management services, 20 minutes or more of clinical staff/physician/other qualified healthcare professional time in a calendar month requiring interactive communication with the patient/caregiver during the month

CPT Code 99453

Remote Monitoring of Physiologic Parameters

Kencor Health's SAMI™ enables seamless distribution, enrollment, and setup of vital devices for Chronic Care Management (CHF, Hypertension, Diabetes, and much more).

CPT Code 99454

Remote Monitoring of Physiologic Parameters

SAMi is a virtual assistant, acting as your care team to securely collect vital device data, sending programmed alerts based on ML/AI algorithms and organize the patient health data into actionable tasks.

CPT Code 99457

Remote Monitoring Treatment Management Services

SAMi provides your primary care team with a portal to securely communicate via Phone/SMS/Messaging with the patient's family and caregivers to capture and document all data automatically.

CPT Code 99458

Remote Monitoring of Physiologic Parameters

Clinical staff/physician/other qualified health care professional time in a calendar month requiring interactive communication with the patient/caregiver during the month; additional 20 minutes on top of CPT# 99457.

CPT Code 99091

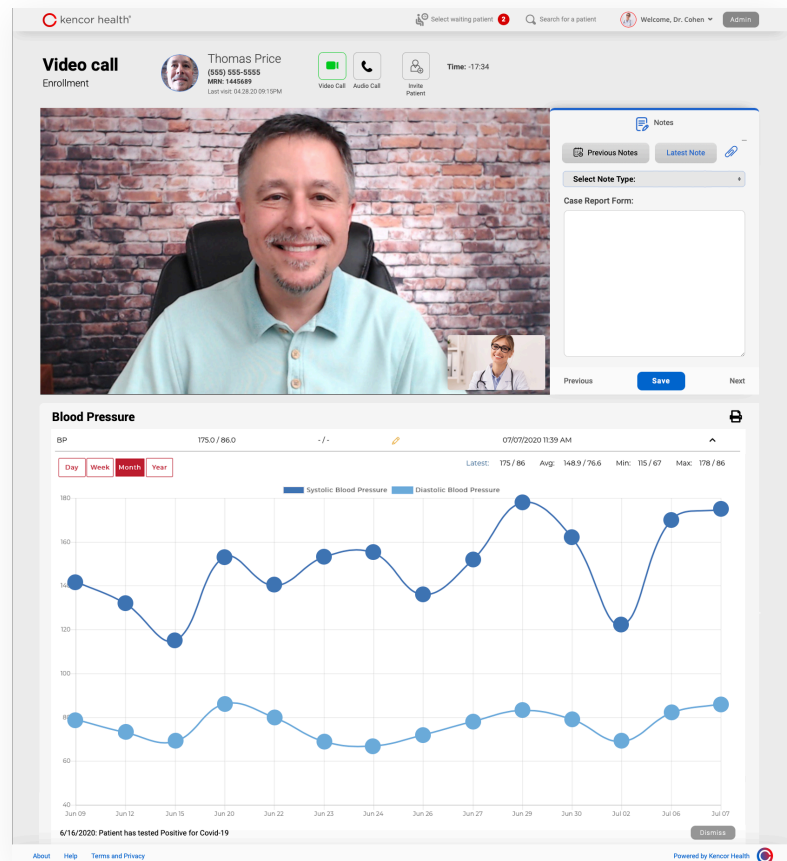

Collection and Interpretation of Physiologic Data

(e.g. ECG, blood pressure, glucose monitoring) digitally stored and/or transmitted by the patient and/or caregiver to the physician or other qualified healthcare professional, qualified by education, training, licensure/regulation (when applicable).

CPT Code 99490

Chronic Care Management Services

At least 20 minutes of clinical staff time directed by a physician, or other qualified health care professional, per calendar month, with the following required elements:
Multiple (two or more) chronic conditions expected to last at least 12 months, or until death.
